Navigator Bulk Bag Unloader

Navigator is the worlds only automated bulk bag unloader. A single electric drive mounted low and to the side provides the means to direct loaded bags in and out of loading zone. Bags are loaded and spotted perfectly every time-all automatically. Once loaded, bag automatically raises as contents discharge. Once bag has been discharged, empty bag raises up and out of unloading zone, all without any operator inputs.

Safe

Operator is clear of moving bag.

Control is remote located-keeps operator clear of bag

No more swinging/twisting bags in while in motion

Smooth linear bag positioning and loading

Great for low headroom installations

Adjustable vertical bag unload rate of lift

Remote operation

Fully automatic with optional PLC control

Sanitary

No oil or machinery over bag zone.

Vibrated bag pan with optional bag massager

Drive mounted low and to the side-easy maintenance

7.5 HP electric motor drive

Adjustable rate of lift-load speed

Simple-two limit switches, one proximity is all it requires

Balanced frame

Food grade/ USDA-3A dairy/ Chemicals/ Plastics/ Nutraceuticals
